

Membership Secretary's Report

At 1st January 2019 The Photographic Group had 689 household members and 1223 total members. At 31st December 2019 the membership stood at 725 and 1272 respectively, an increase of 36 and 49 with an average of 722 and 1274. However, over the year we had 243 and 412 new members but 208 and 363 leavers. Membership continues to rise overall but so does turnover in members. Central Counties Region continues to have the largest number of members.

The figures are derived from the bi-monthly membership list from HQ which now appears to be stable following all the updates. There is still occasionally a problem with 'free memberships' given at shows which HQ has to manually adjust so that Photogroup receives the appropriate subscription. The Treasurer and I continue to cross check the spreadsheets.

Four editions of Photocamper have been distributed to all household members by our printers.
